Prague, 6<sup>th</sup> May 2010

FOR RELEASE: IMMEDIATELY

## HWg-Juno: A new family of I/O devices for IP CCTV

HWg-Juno is an I/O device for IP CCTV integration. You can simply connect digital inputs & relay outputs to your current central IP video management system. HWg-Juno support protocols for seamless integration with most IP Video software packages.

There are currently no widely supported standards for connecting external Digital Inputs & Outputs (I/O) to IP CCTV software. I/O integration is necessary to interconnect central IP Video monitoring system with other systems (security & fire system, Access control system, HVAC, entrance gates, power systems).

HWg-Juno is a product line designed for I/O integration with IP CCTV. It supports proprietary protocols of several IP Video systems. No driver is necessary. HWg-Juno is simply an IP camera with many Digital Inputs & Outputs, without video stream.

Reduce integration costs with HWg-Juno. HWg-Juno is a hardware solution for plug & play I/O integration. HWg-Juno prevents software integration cost escalation

First public presentation of HWg-Juno is scheduled for the IFSEC 2010 exhibition (Birmingham UK), Hall 4, Stand G162.

## **Summary:**

- HWg-Juno is I/O device for IP CCTV
- HWg-Juno will be supported in IP CCTV you are using today.
- HWg Juno provides predicable flat integration cost.

## **About HW group**

HW group is a manufacturer of IP-based sensors, located in Prague - Czech Republic. HW group delivers remote monitoring & control solutions. The company focuses on IP-serial port devices and IP remote monitoring products. HW group distribution network spans over Europe, Middle East, South & North America.
