HWg STE: Ethernet thermometer (hygrometer) with SNMP and WEB interfaces.

HWg STE alerts by e-mail to temperatures outside of a safe range. Supplied with a power adapter and one temperature sensor, another temperature/humidity sensor can be connected.

HW group presents HWg STE, IP network thermometer with a built-in web interface. HWg STE sends e-mail alerts if the temperature exceeds a specified limit.

Using SNMP, the HWg-STE can be connected to a NMS (Network Management System). HWg STE represents effective and economic solutions in following applications:

- **Air-conditioning failure**
Changes in temperature point to a failure of an A/C unit.
- **Heating system monitoring**
Remote monitoring of a heating system, alert by e-mail or SMS (Email-2-SMS) to a danger of freezing.
- **Cooler/freezer monitoring**
Sends an e-mail if the cooler fails. Logs operating and storage conditions.
- **Heating optimization**
Saves heating and air-conditioning costs.
- **Food storage**
Oversees optimal storage conditions. With application software, HACCP reports can be created.

About the company

- HW group s.r.o. is a dynamic company based in the Czech Republic. Since 2000, HW group manufactures and distributes network technology products. The product portfolio is targeted to measuring and data collection. Approximately 60% of the production is destined to the EU market, 30% is exported outside of the EU.
